

Aga Khan Award for Architecture

Ugandan Project on 2019 Shortlist for Aga Khan Award for Architecture

Master Jury to decide share of US\$ 1 million prize

Nansana, Uganda, 25 April 2019 – The **Ashinaga Uganda Dormitory** in Nansana, has been shortlisted for the 2019 Aga Khan Award for Architecture. The announcement was made by Farrokh Derakhshani, Director of the Award, in a ceremony in Kazan, Russia, today.

For information about the other 19 projects on the shortlist, please see www.akdn.org/architecture and the full on-line press kit, which includes briefs on each project and high-resolution images: www.akdn.org/2019ArchitectureAward.

The Aga Khan Award for Architecture is one of the oldest major awards in the field of architecture. It selects projects – from slum upgrading to high-rise “green” buildings – that not only exhibit architectural excellence but also improve the overall quality of life. The Award rewards architects, but also identifies municipalities, builders, clients, master artisans and engineers who have played important roles in the realization of a project.

“Architecture can be an aid to viewing the world in plural terms,” said Farrokh Derakhshani, Director of the Award, “The 50 orphans from sub-Saharan Africa who are accommodated at the **Ashinaga Uganda Dormitory** learn how to navigate through a world that is inherently diverse.”

The **Ashinaga Uganda Dormitory** is part of a residential school where students learn to live together with people from different cultures. Students are prepared to enter universities abroad. Six buildings that house classrooms, a canteen, separate dormitories for girls and boys, offices, and staff quarters surround a planted courtyard, the social centre of the community. Linear modules of brick walls are spaced in bays of three or four metres; smaller spaces are delineated within some of the bays. Concrete frames permit large openings and support steel posts that hold the wood-truss roofing that is covered with metal sheeting. The architects took special care to work with (and train) the carpenters and masons in order to attain the high quality of workmanship, including, for example, working with masons in the making of bricks.

The sites will now undergo a rigorous investigation by experts who visit and evaluate each project on-site. Their reports are the basis for the Master Jury’s selection of the eventual laureates. It should be noted that projects commissioned by the Aga Khan or any of the institutions of the Aga Khan Development Network (AKDN) are ineligible for the Award. To be eligible for consideration in the 2019 Award cycle, projects had to be completed between 1 January 2012 and 31 December 2017, and should have been in use for at least one year.

The Aga Khan Award for Architecture was established by the Aga Khan in 1977 to identify and encourage building concepts that successfully address the needs and aspirations of communities in which Muslims have a significant presence. The Award recognises examples of architectural excellence in the fields of contemporary design, social housing, community improvement and

Notes

The Aga Khan Award for Architecture is part of the Aga Khan Development Network (AKDN). It currently operates 1,000 or so programmes and institutions in 30 countries.. It employs approximately 80,000 people, the majority of whom are based in developing countries. The AKDN's annual budget for non-profit development activities is approximately US\$ 950 million. Its economic development arm, the Aga Khan Fund for Economic Development (AKFED), generates annual revenues of US\$ 4.3 billion, but all surpluses generated by its project companies are reinvested in further development activities, usually in fragile, remote or post-conflict regions.
